Dear Hiring Manager,

I am writing to express my interest in the Software Developer role at Oracle. With over three years of experience in Python development, including expertise in Flask, Django, AWS, and API integration, I am well-prepared to contribute to your engineering team's mission of delivering seamless, user-centered applications.

In my current role at Infosys, I have led the development of scalable back-end solutions, including an automated eSignature workflow that reduced manual work by 50% and an eTMF Auto Filing System that streamlined document management, cutting workload by 80%. My experience with multi-process architectures and server-side logic, along with a collaborative approach to integrating front-end components, align well with oracle requirements.

I am enthusiastic about the opportunity to bring my technical skills and passion for innovation to oracle. Thank you for considering my application.

Sincerely,

Naga Ganesh Tunuguntla
